

SUEZ CANAL SEARCH LIGHT 2000W 3000W

MODEL SSC 50E

Small & lightweight model

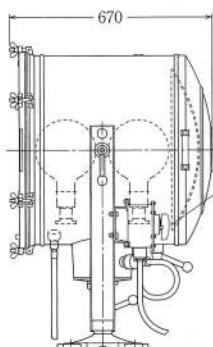

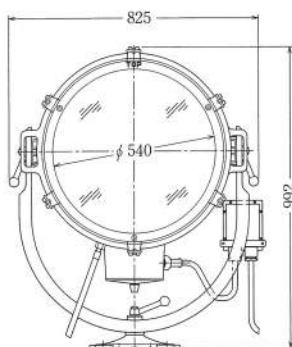

MODEL SSC-50E

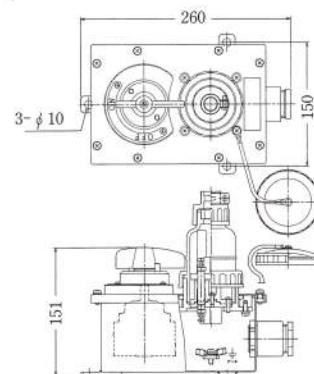

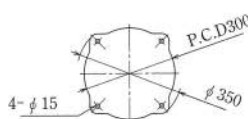

SWITCH BOX
MODEL SRS3-2

a front glass protector
(option)

DEVICE-SIDESWITCH
(OPTION)

FEATURES

1. This device was made to specifications that are fully compliant with established Rules of Suez Canal Authority Navigation.
2. This device was made lightweight with strict attention to weight so as to make it simple to move. It is also provided with carrying handles in front of and behind the light to make it as easy to carry as possible.
3. A device-side switch is provided that can be attached to the light support arm as an option, allowing handy operation by the operator. *See the arrangement diagram
4. This device is often stored in an ordinary (when unused) ship's hold, so it comes with a front glass protector to prevent contact damage during storage or moving.
5. Nippon Kaiji Kyokai (NK) certificate is attached to the product as standard, but upon your instructions a certificate of any ship classification society can be attached.
